top tips

- Try to view a complete album of one wedding they have done, not just a collection of good shots they have taken.
- Get a written contract. Establish the coverage required and a time schedule for the day.
- If you are having a package, find out exactly what it includes and the cost of any extras. Get prices for extra prints and albums.
- Ask whether yor photographer will provide a DVD of the high resolution photo files.
- Don't make your decision based on price alone. It is important to meet your photographer personally and be comfortable with them.
